

Factorylink 8.0[®] Training

Course Outline

Overview

During the FactoryLink 8.0 Training Course, students will be introduced to major FactoryLink modules and have the opportunity to practice using them during hands-on exercises. Students will learn the basics of implementing, customizing, and maintaining FactoryLink systems.

Recommended Audiences

New or current FactoryLink users and application developers responsible for installing, configuring, maintaining and troubleshooting FactoryLink applications should attend this course. If further detail on advanced topics must be covered to meet your needs, consider having us put together a custom course for your company

Schedule

The following schedule contains an approximation of the information covered on a daily basis. To best serve the needs of each class, topics may be rearranged or modified at the instructor's discretion. The final day of the course is reserved for review and further discussion deemed appropriate by the instructor.
